

Watch your Netflix movies, TV shows on Le Pan Tablet

Los Angeles, Aug. 30th. We are thrilled to announce that Le Pan tablet is among many Android OS operated handsets, tablets that can run Netflix to watch the movies, TV show you loved.

Some early adopters of Android OS devices have complained that their handsets, or tablets cannot watch movies, TV shows through Netflix. This is some technical issues need solved not solely by devices manufacturers. After months' works by Netflix and Android OS developers, Netflix has begun to roll out a Netflix application for the Android platform. And it's a free app available for download from Android Market. The Market download will initially be available only on select phones that currently have the requisite playback support. Le Pan proud announces that our tablet now can support and running Netflix application so you extend your enjoyment of watching movies on our tablet.

The Netflix realizes that “The Android platform is gaining rapid adoption in the mobile world and presents a great opportunity to reach more of our members. Because the platform has evolved so rapidly, there are some significant challenges associated with developing a streaming video application for this ecosystem. ” Le Pan recognizes the importance of to get the device to meet the demands of our tablet users. Through our engineers’ tireless hard works, we upgrade our system and make Le Pan to be one of top line Android OS devices that can support playback of Netflix programs.

Go grab a Le Pan, watch your movies, TV shows wherever you are, at your living rooms, bed rooms. You can bring your favorite movies with you when you are away, at your favorite coffee shops, at airports, on the planes and in the hotel rooms where there is a WI FI connection.
